

K4 KEYBOARD SERIES – MANUAL

PLUG-AND-PLAY

Connect the K4 to the USB port. Driver installation starts automatically.

SETTINGS AND FUNCTIONS

The K4 features a range of customization options and convenient quick keys. All settings are made directly on the keyboard, by pressing the FN key + the desired setting key.

RGB ILLUMINATION

Press FN + INS to start a cycle of shifting backlight colors.

Press FN + HOME repeatedly to switch between 7 different background colors.

Press FN + PGUP for LED illumination in 6 color zones. To set the color of each zone, press FN + PGUP again. When the NUM, CAPS and SCROLL lights in the upper right corner blink, press FN + the numbers 1–6 repeatedly to adjust the colors. When you're done, press FN + PGUP again.

Press FN + DEL repeatedly to switch between two different wave effects.

Press FN + END once to start the 7-color breathing effect cycle, and twice to lock the breathing effect at the current color.

Press FN + PGDN to start a multi-color typing effect. [Visible when typing.]

Press FN + the up/down arrow keys to increase/decrease the brightness of the LED lighting.

Press FN + the left/right arrow keys to decrease/increase the speed of the LED effects.
